Student's Name

BSCS 3A

Course/Year/Section

June 23-27, 2025	A tribute to mother earth: Grow your own food project: backyard gardening and plant a tree (fruit tree)
Objective:	- to promote self-sustainability, environmental awareness, and healthy eating habits.

NARRATIVE DISCUSSION

In June 23, 2025, in Guincaiptan, the first thing I did was clean up the backyard. I removed all the weeds, leaves, plastics, and bottles. Once I finished my cleaning activity in my backyard, I Identified the best spot to plant some bearing fruit tree and also having enough sunlight so that my plant gets healthy.

In June 24, 2025, the second thing I did, I started loosening the soil using a spade and added some soils that having more nutrients so that my plants well become healthy once they consume it. In the third day, June 25, 2025, I planted Dalandan, Sili, Eggplants and Tomatoes. And after that I watered it right and added supports using sticks.

In the fourth day, June 26, 2025, I was visiting my garden and watered it thoroughly, remove weeds and checking all the plants I planted as well as the fifth day June 27, 2025.

July 7-11, 2025	ICT for children: Tutorial class
Objectives:	<ul style="list-style-type: none"> -To help younger generation appreciate the importance of Information and Communication Technology; -To develop children's love for learning through integrating ICT in teaching; -To raise awareness to children the advantages and disadvantages of ICT.

NARRATIVE DISCUSSION

During this week, June 9, 2025, we're having a tutorial class at Guincaiptan Elementary School about ICT. We introduce the basic concepts of ICT to the selected student in guincaiptan, teach them the parts of hardware components of computer and other parts that related to ICT. And after the introduction and discussion we're having a brainstorming activity about the discussion we presented and all students have questioned and luckily, they answered it correctly and on the second day, June 10, 2025, we teach them how to write their names in the Microsoft Word at Guincaiptan Barangay Hall and some of them know how to use laptop and the others are not really familiar in laptop on how to use it so that we facilitate them to know more.

July 21-25, 2025	A tribute to mother Earth: Clean-up drive
Objectives:	<ul style="list-style-type: none"> - to promote environmental awareness and community responsibility by organizing a clean-up drive that aims to reduce litter, improve cleanliness, and foster a sense of stewardship for public spaces within the community or school environment. - to engage students in hands-on efforts to preserve the environment and encourage sustainable practices.

NARRATIVE DISCUSSION

The activity began in the afternoon at 1pm in July 24,2025, with an orientation led by barangay captain at the Guincaiptan Barangay Hall. Our clean-up drive took place in public areas like the barangay plaza and the old basketball court near the Baryo site. We worked in teams with brooms, sacks, and cleaning tools, removing litter and weeds. Community members expressed their appreciation, which boosted our motivation. And in June 28, 2025, we joined a school-wide clean-up drive at DEBESMSCAT with all incoming 4th-year students from BSCS and BSIS. Together, we cleaned classrooms, rest areas, and college grounds. Both events deepened our sense of environmental stewardship. We realized that community service doesn't always require money just initiative, teamwork, and a genuine concern for the environment.
